

Week 11, March 10 – March 16, 2019

Department of Health and Community Services
Government of Newfoundland and Labrador

Respiratory Weekly

Highlights

- ⇒ In week 11, there were 53 laboratory-confirmed cases of influenza reported (Table 1).
- ⇒ As of March 16, 2019, there have been 516 (513A, 3B) laboratory-confirmed cases, 110 hospitalizations, 31 ICU admissions and 11 deaths.
- ⇒ Across Canada, influenza activity continues to be reported in almost all regions, but eastern regions are reporting higher levels of activity compared to western regions. Influenza A (H1N1)pdm09 is the most common influenza virus circulating in Canada.
- ⇒ Cases have been reported in all regional health authorities, with approximately 43% of cases reported in Eastern Health (Figure 2).
- ⇒ Approximately one-quarter of cases reported to date were less than 20 years of age (Figure 3).
- ⇒ Fourteen confirmed influenza outbreaks have been reported so far this season (Figure 4).
- ⇒ Emergency room visits with influenza-like illness (ILI) have increased from last week (Figure 5).
- ⇒ Other respiratory viruses circulating in week 11 include RSV, PIV, adenovirus, entero/rhinovirus and hMPV (Table 3).
- ⇒ Symptomatic respiratory HealthLine calls have decreased from last week (Figure 6).

Laboratory-Confirmed Cases

Table 1: Number of positive influenza cases in NL, by severity, week 11, 2018-2019 season

	Cases	Hospitalizations	ICU Admissions	Deaths
Week	53	13	0	1
Total	516	110	31	11

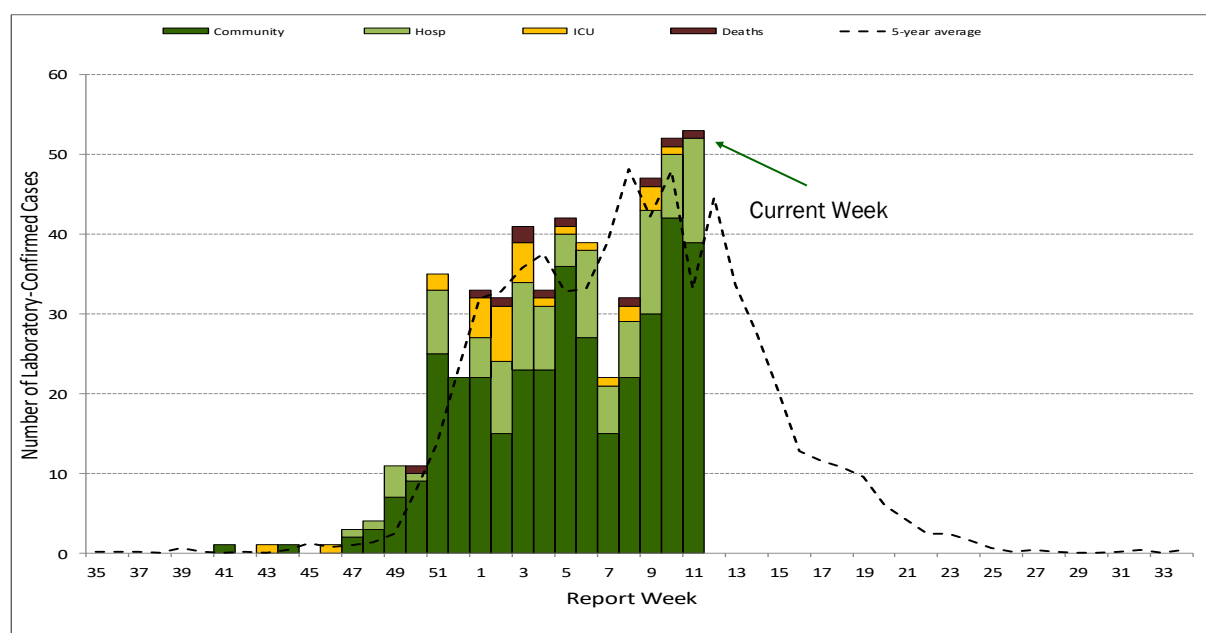

Figure 1: Number of cases, hospitalizations, ICU admissions and deaths, by week virus identified, 2018-2019

Influenza by type, RHA

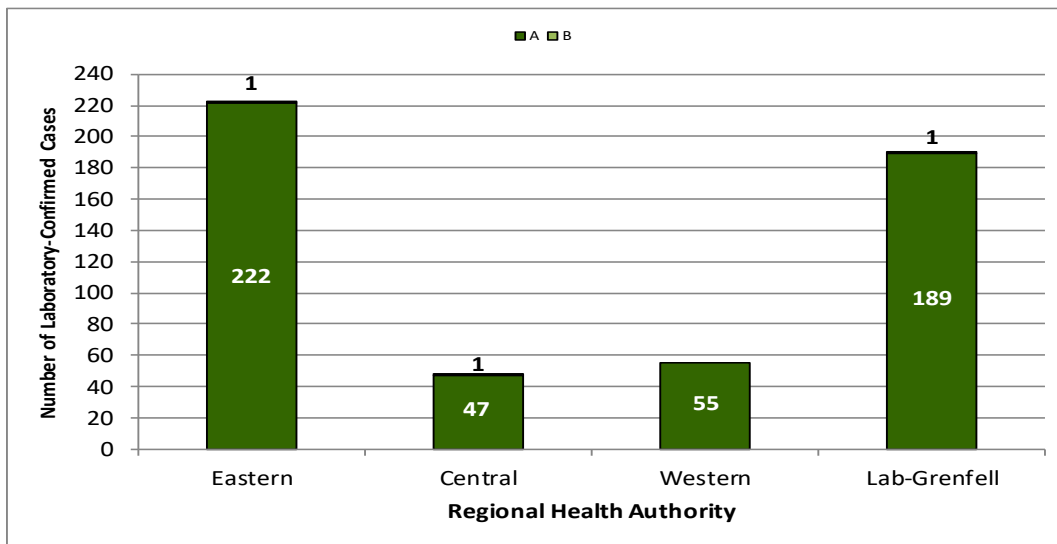

Figure 2: Total number of laboratory-confirmed influenza A and B, by Regional Health Authority, 2018-2019

Influenza by age group (n=516)

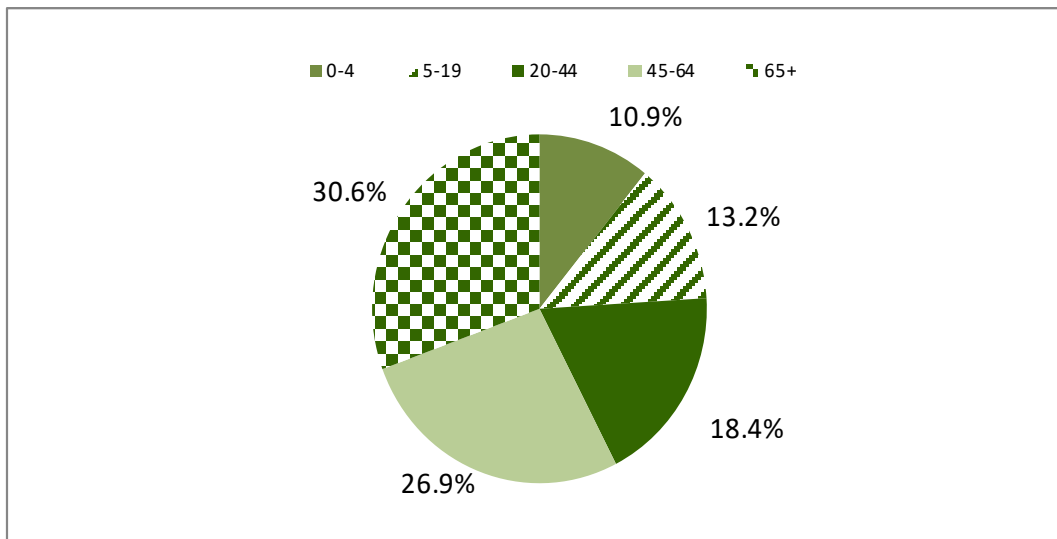

Figure 3: Percent of laboratory-confirmed influenza in NL, by age group, 2018-2019

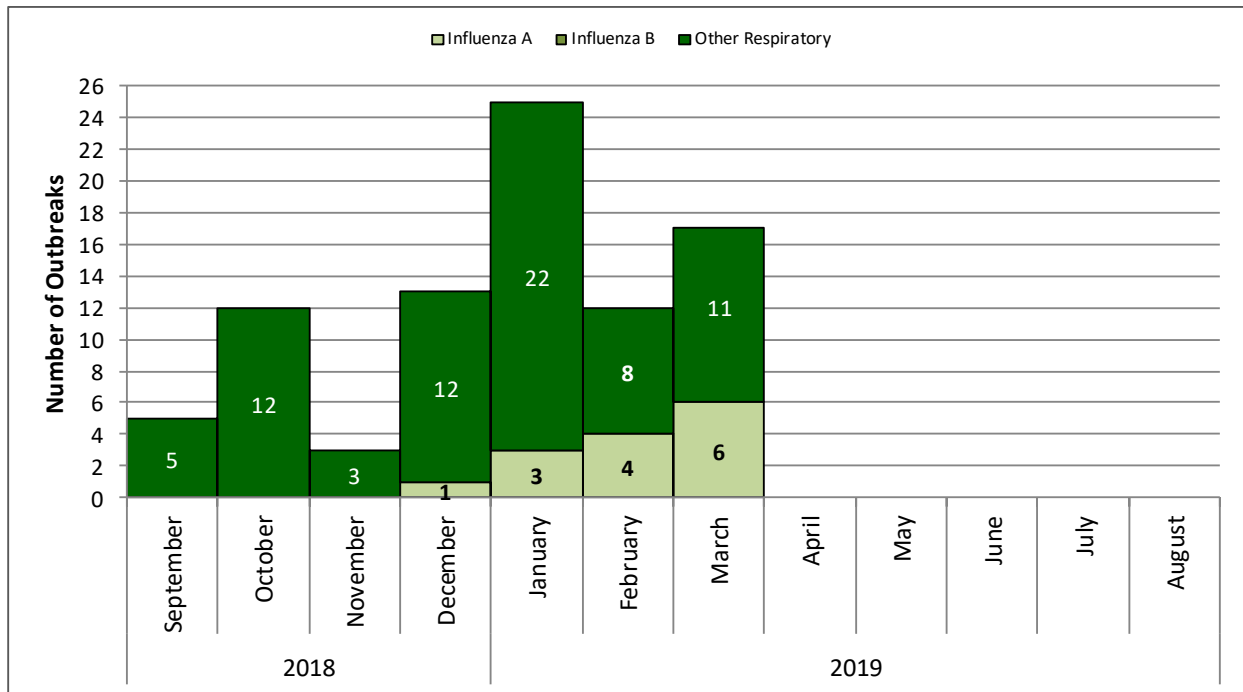

Antiviral Resistance

Table 2: Cumulative antiviral resistance by influenza virus type and sub-type, Canada, 2018-2019

	Oseltamivir			Zanamivir			Amantadine		
	Tested	Resistant		Tested	Resistant		Tested	Resistant	
	#	#	%	#	#	%	#	#	%
A (H3N2)	101	0	0	101	0	0	61	61	100
A (H1N1)	857	3	0.4	854	0	0	315	315	100
B	34	0	0	34	0	0	--	--	--
Total	992	3	0.3	989	0	0	376	376	100

Other Respiratory Viruses

Table 3: Weekly and total number of positive respiratory virus specimens in NL, by type, 2018-2019 season

	Week 11	Total
R.S.V.	22	344
Parainfluenza virus 1	0	0
Parainfluenza virus 2	2	49
Parainfluenza virus 3	4	88
Adenovirus	1	29
Entero/Rhinovirus	3	271
hMPV	9	56

Source: Respiratory Virus Detection, Public Health Agency of Canada; Public Health and Microbiology Laboratory, Eastern Health
 *Total from August 26, 2018 to March 16, 2019.

HealthLine

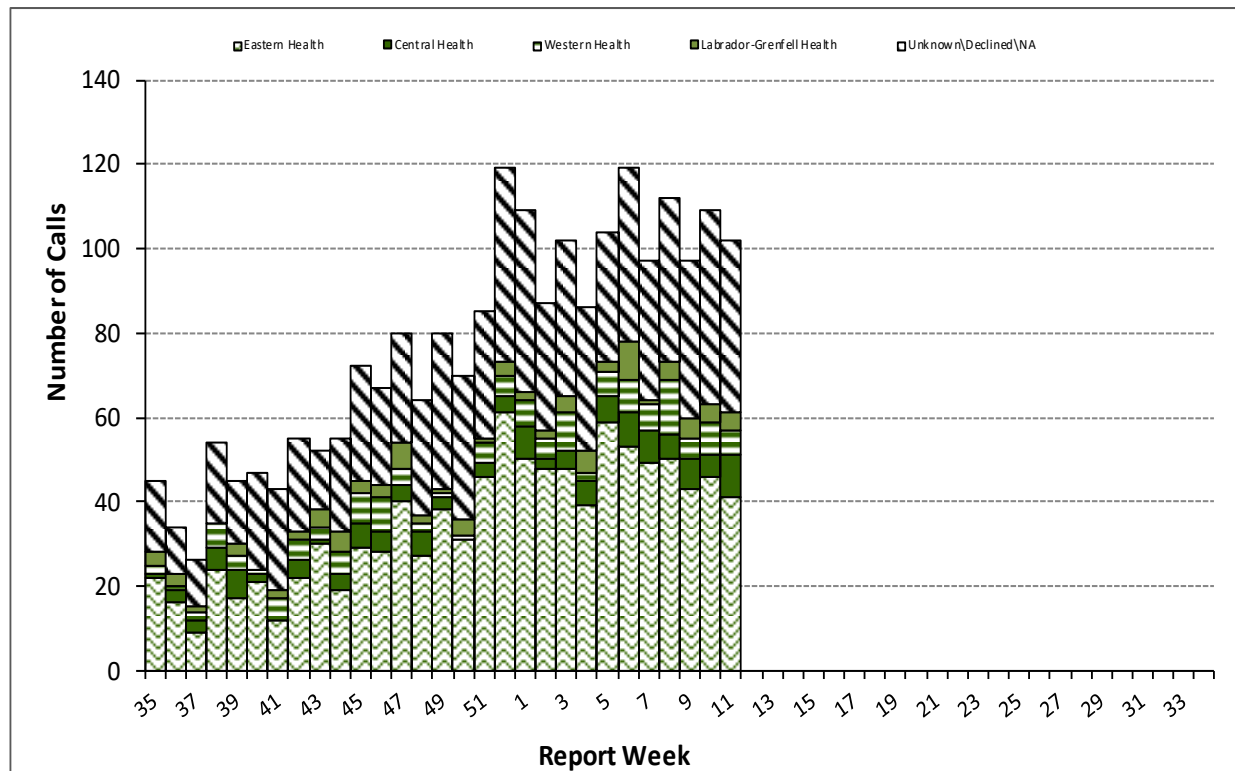

Figure 6: Number of influenza-like-illness HealthLine calls by week and RHA, NL, 2018-2019 season
