

Week 6, February 3 – February 9, 2019

Department of Health and Community Services
Government of Newfoundland and Labrador

Respiratory Weekly

Highlights

- ⇒ In week 6, there were 39 laboratory-confirmed cases of influenza reported (Table 1).
- ⇒ As of February 9, 2019, there have been 310 (308A, 2B) laboratory-confirmed cases, 60 hospitalizations, 24 ICU admissions and seven deaths.
- ⇒ Across Canada, eastern regions are reporting higher levels of activity compared to western regions. Influenza A (H1N1)pdm09 is the most common influenza virus circulating in Canada.
- ⇒ Cases have been reported in all regional health authorities, with almost half of cases reported in Labrador-Grenfell Health (Figure 2).
- ⇒ Over one-quarter (27%) of cases reported to date were less than 20 years of age (Figure 3).
- ⇒ Four confirmed influenza outbreaks have been reported so far this season (Figure 4).
- ⇒ Emergency room visits with influenza-like illness (ILI) have remained the same from last week (Figure 5).
- ⇒ Other respiratory viruses circulating in week 6 include RSV, PIV, adenovirus, entero/rhinovirus and hMPV (Table 3).
- ⇒ Symptomatic respiratory HealthLine calls have increased from last week (Figure 6).

Laboratory-Confirmed Cases

Table 1: Number of positive influenza cases in NL, by severity, week 6, 2018-2019 season

	Cases	Hospitalizations	ICU Admissions	Deaths
Week	39	8	1	0
Total	310	60	24	7

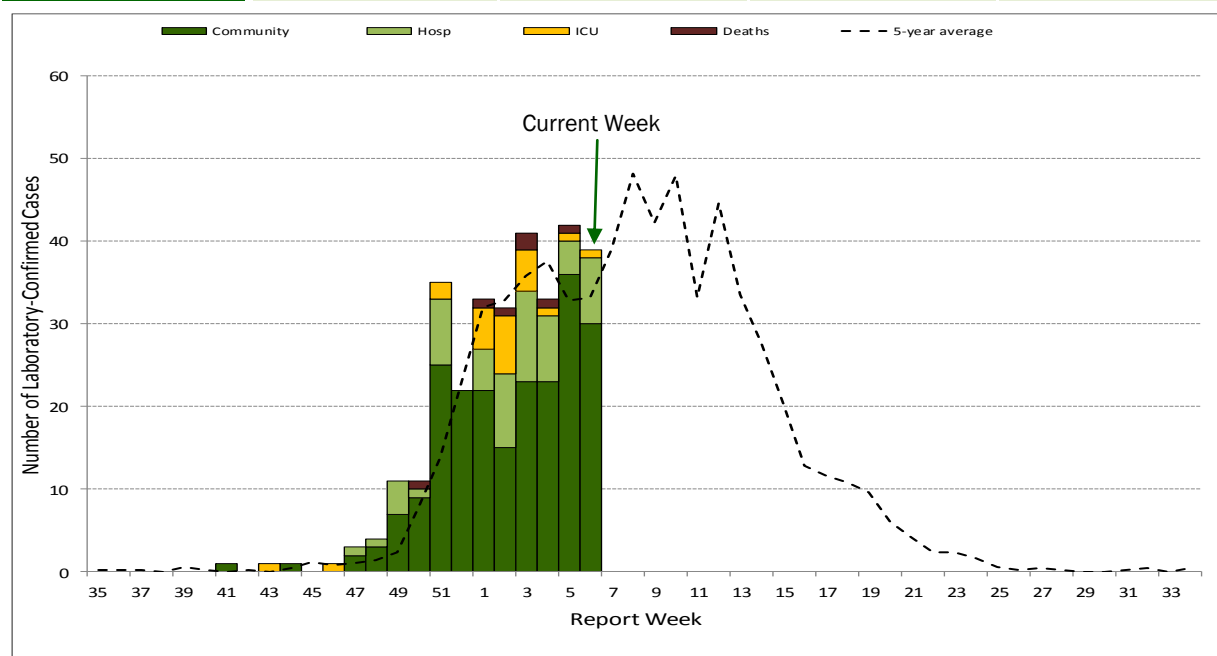

Figure 1: Number of cases, hospitalizations, ICU admissions and deaths, by week virus identified, 2018-2019

Influenza by type, RHA

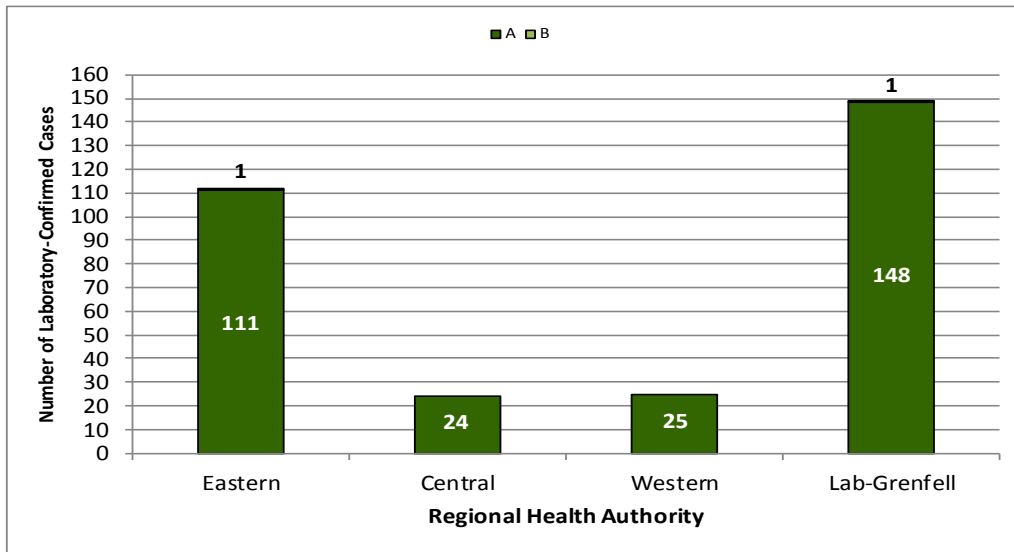

Figure 2: Total number of laboratory-confirmed influenza A and B, by Regional Health Authority, 2018-2019

Influenza by age group (n=310)

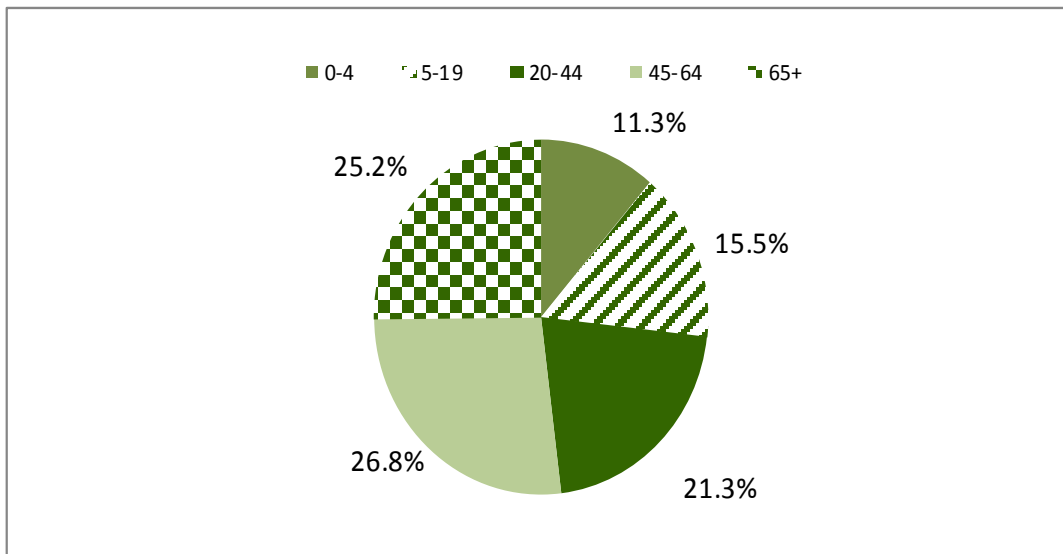

Figure 3: Percent of laboratory-confirmed influenza in NL, by age group, 2018-2019

Antiviral Resistance

Table 2: Cumulative antiviral resistance by influenza virus type and sub-type, Canada, 2018-2019

	Oseltamivir			Zanamivir			Amantadine		
	Tested	Resistant		Tested	Resistant		Tested	Resistant	
	#	#	%	#	#	%	#	#	%
A (H3N2)	61	0	0	61	0	0	47	47	100
A (H1N1)	647	1	0.2	646	0	0	278	278	100
B	22	0	0	22	0	0	--	--	--
Total	730	1	0.1	729	0	0	325	325	100

Influenza and Other Respiratory Outbreaks

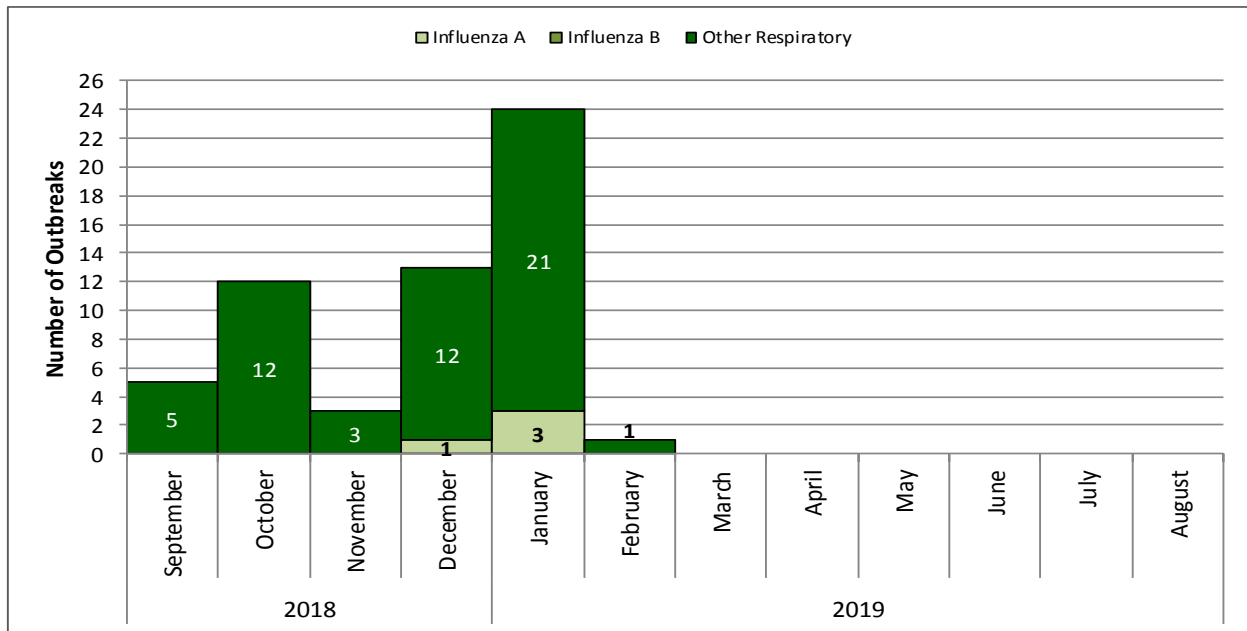

Figure 4: Number of influenza and other respiratory outbreaks, by month of onset, NL, 2018-2019

Emergency Department Influenza-like-illness

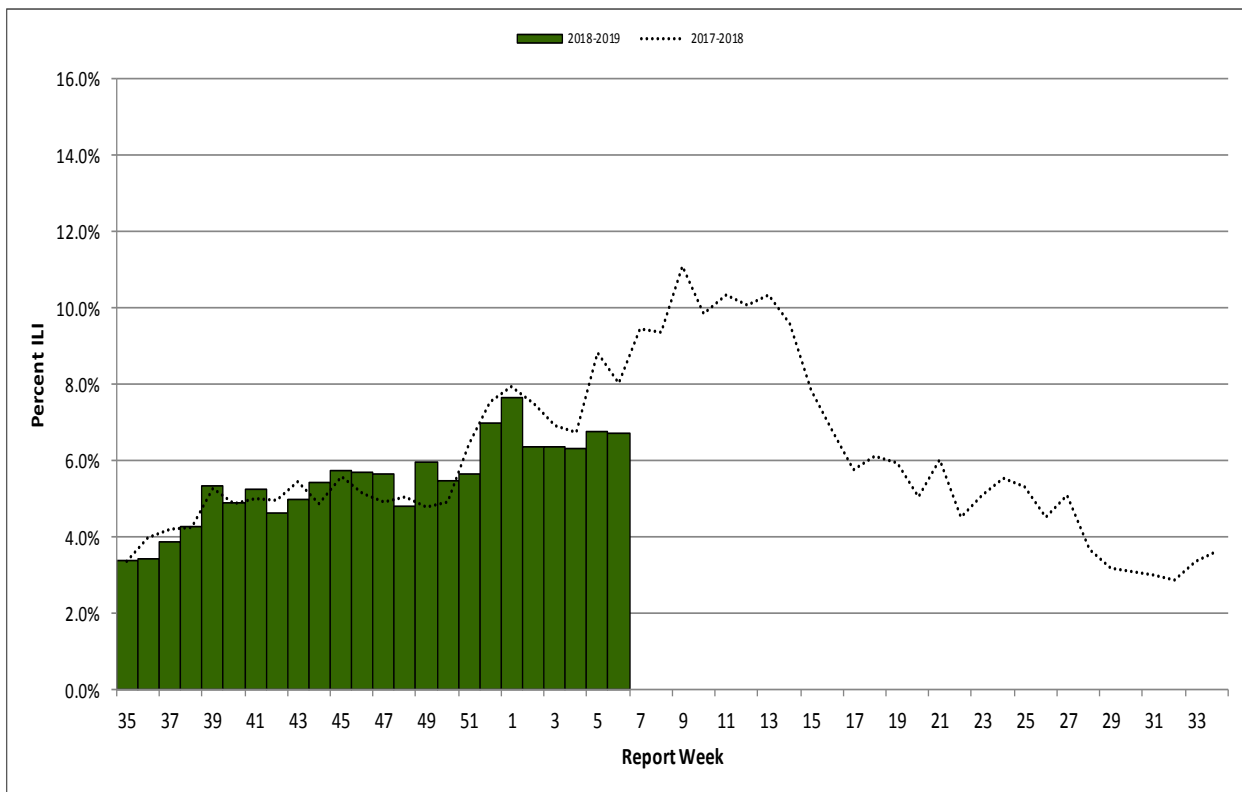

Figure 5: Percent of emergency department visits with ILI by report week, NL, 2018-2019

Source: Emergency room data provided by the four regional health authorities.

Other Respiratory Viruses

Table 3: Weekly and total number of positive respiratory virus specimens in NL, by type, 2018-2019 season

	Week 6	Total
R.S.V.	27	196
Parainfluenza virus 1	0	0
Parainfluenza virus 2	5	31
Parainfluenza virus 3	4	52
Adenovirus	4	24
Entero/Rhinovirus	7	243
hMPV	7	24
